

Bingham 203 Media Cart

The cart is designed to facilitate video presentations in a classroom setting. VGA and audio cables are provided, as well as an HDMI patch (output selection instructions are posted inside the cart.) HDMI cables and VGA adaptors for Macs are the responsibility of the user.

The projector remote is to be **returned to the interior** of the cart, the power strip is to be **shut off**, and the door shut after every use.

The control board for the stage lighting is stored in the cart and must be returned after use. **Contact Rob Hamilton (hamiltn@email.unc.edu) to schedule an orientation session regarding the lighting system.**
